

Establishing Peering

This section completes the introduction by looking at simple deployment scenarios newcomers to interconnection and peering will likely encounter.

- [Connectivity to another Network](#)
- [Single Upstream](#)
- [Adding a Private Peer](#)
- [Adding Two Private Peers](#)
- [Peering at an IXP](#)

For other scenarios and a more in-depth look at interconnects, the [Intermediate](#) section of the Peering Toolbox will cover those in greater detail.
