

# IPv6 Deployment Workshop

- **Date:** 12th to 16th January, 2019
- **Venue:** Namgay Heritage Hotel, Thimphu, Bhutan

## Workshop Goals

This five-day IPv6 Deployment Workshop, teaches network operators how to deploy IPv6 on their network infrastructure.

## Target Audience

Technical staff who involved in Internet technology standards, local and national network infrastructure deployment, and day to day network operations.

## Pre-requisites

It is assumed that the workshop participants know how to use a router command line interface, do basic router configuration and have a working knowledge of an IGP (OSPF or IS-IS) and BGP fundamentals. Knowledge of the IPv6 protocol is helpful but not essential.

**This workshop is not an introduction.** The lab exercises use Cisco IOS configuration syntax.

**Participants are required to bring their own laptops.** These can be Windows/Linux/macOS and must have working wireless to allow participation in the hands on lab exercises.

## Class Size

The workshop can accommodate up to 30 participants
